THE Pullman strike with its at tendant boycott is another example of the pernicious interference of the walking delegate. The strike should man company were content to close wages demanded. They did not call in outsiders to take the place of the evidence that they could not pay a higher rate of wages and meet expenses. No better chance for arbitration ever existed. All this the walking delegate ignores. He calls for a "sympathetic strike." That means that thousands of men the country over shall engage in a quarrel with which they have nothing to do and the merits of which they know nothing about. It means that millions in wages shall be lost to the strikers and other millions to the public by the suspension of transportation facilities. It means staryation to many innocent women and children. It means that the walkchildren. It means that the walk-ing delegate takes the public by the laborers at home or abroad? —Chithroat and burks an industry on cago Inter-Ocean. which so many more industries demore than the employers, are the the junk shop. vampires that suck the blood of their in public favor and the boycott is will damage the strikers, the cause It will fail—as it deserves to fail.

ANY aspirations which Gov. Me-Kinley may have for the Presidency are destroyed by the attitude of Ohio on Protection. The Conger interview was clearly got up to pave the way and prepare the mind of the public for a Republican flop on the tariff question. Col. Conger is believed to be the mouth piece of Tom Reed, and he practically endorses and approves of the Wilson bill. It is too bad that the Democrats have allowed the mutilation of the bill in be shot down.

A man makes a contract to pay one allowed the mutilation of the bill in be shot down. the Senate. It will vet be found that the whole country was at the back of that bill, but the plutocrats bought up enough of opposition to defeat some of its best features.

THE "Black Death," an epidemic beside which cholera is a mere nothing, has broken out in China and has been raging in Canton, Hong Kong and other cities for three months. It kills from 80 to 90 per cent. of those affected and medical science knows practically nothing about its cause or cure. At various times it has wrought fearful havoe, notably in London in 1665. Our intercourse with Asiatic parts is now so extensive that it might well happen that the scourge might be imported. Quarantine measures should be taken will have to face irrate constituents and rigidly inforced. They saved us when they get home. The Missouri from the cholera last year and should delegation will be made welcome, be used against this still more terri- but in some States there is a woful ble scourge.

Tuis week W. C. Lambert announces himself a candidate for the office of County Treasurer. There is probable no better known citizen in Scott county than is Mr. Lambert. He in England by the move, but she is made an efficient Justice of the Peace and has been and is an equally efficient Coroner. He is a good business man, a good Democrat, is public spirited and has progressive ideas on all public questions. His integrity is beyond question and the Treasurer's office would, we believe, be entirely safe in his hands.

It is now in order for the Republican press to charge the Debs boycott wrong on Silver and has been sent to the Democratic party, which is as to the rear. Now, if his namesake responsible for that as it is for the of Kentucky, shall also be sent to th price of wheat, etc.

THE Jefferson City Tribune calls licans and Populists are more active than the Democrats this year. It fears a fusion. That would be awking the first trusts. If all the steps taken in a wrong direction, the Democratic side there may be ple, we may yet have a Senate in danger. Right here, in Scott county, the Republicans are not aggressive, and the Populists—well, the lists are not causing any loss of sleep or appetite.

When barter or an exchange of commodities, which preprevails in rude states of society, was inconvenient if not impossible, represenatives of value were indispensable

in making exchanges.

We need not stop to inquire the many and powerful reasons why the two metals, silver and gold, were thus associated inthedawnofcivilization, why they have been inseparable companions through the ages, nor There is not an instance on record in

The earliest trace of the use of gold or monetary purposes, in common with that of silver, is found in the ancient Egyptians weighing in scales

heaps of rings of gold and silver. Silver is named in the Old Testament, and is spoken of as one of the valuable possessions of Abraham. He purchased the field Ephron for 400 shekles of silver. They were weighed and designated as "current money with the merchant." Joseph was sold by his brothers for 20 pieces of silver. In the time of the famine we are told that Joseph got the silver from Canaan in exchange for corn from Canaan in exchange for corn. Abraham's servants brought gold and silver jewels to Rebekah.

marvelously sustained. When the great gold discoveries were made in California and Australia 1849–52 there was a threatened disturbance in this relation. In the money centers there was a clamor for the complete demonetization of gold because of its enormous production. There was a great fall in its price relatively to silver.

Learned geologists, who had given attention to this subject, insisted that there was no ground for the belief that gold would permanently depreciate. The flood of gold would be inlied that gold was superficially depreciated, while silver veins extended deeper and were therefore more inexhaustable than gold, and that the production of silver increase.
